LIBRARY

A black and white photograph of a handwritten document, likely a letter or report. The text is written in cursive and is somewhat difficult to read due to the quality of the scan. There are several lines of text, and a signature is visible at the bottom right. The document appears to be on a piece of paper with some texture or grain.

25X1X

1. The Bulgarian Government has reportedly decided to construct three dams to further its hydro-electric program. The dams will be called Stalin, Georgi Dimitrov, and Rositsa.
2. The largest, with a capacity of 650 cubic meters of water, will be the Stalin, situated near Sofia. By 1955 it is planned that this dam will supply water for three electric power plants as well as irrigation for 57,000 hectares of land.
3. The Georgi Dimitrov dam near Kazanluk will irrigate 50,000 hectares by 1955.
4. Rositsa dam will be ready in 1952 and will irrigate 40,000 hectares of land on the plains of northern Bulgaria.
